

Cash Drawer Module

The Cash Drawer Module allows you to conveniently secure your cash transactions by opening a cash drawer automatically when you process a cash sale. Between transactions, your cash sales are kept safe in the locked cash drawer.

- Secure drawer locks for safety
- Convenient cash tray is portable and can be removed for balancing your transactions at the end of the day
- PC driven cash drawer operates automatically with cash transactions
- Under-counter mount available or simply place the drawer under your monitor
- Available in both serial and USB versions

Cash drawer is included with the software module. Ask your AWS Consultant for more information.
