LEADERS IN MOVING THE WORLD'S AIR

Heavy Duty Industrial Pedestal Fan

We've taken our Heavy Duty Industrial Basket Fan and combined it with an industrial-strength base and sturdy poly wheels for a powerful pedestal fan that's easy to transport. As the name implies, the Heavy Duty Industrial is our most powerful pedestal fan.

In today's market, many industrial fans look powerful but move very little air. This is not the case with the J&D Heavy Duty Industrial Series Fan. It is an industry leader in air performance and was designed for the industrial market where performance is mandatory for employee comfort and machine efficiency. All units come with a powerful two speed motor.

Features

- Quiet operation
- OSHA approved guard
- Heavy duty pedestal mount with chrome insert tube allows you to adjust height of fan from 4' to 6' on center
- Heavy duty powder coated corrosion resistant guards, base, and pole in white or black
- Wide low profile heavy duty base for stability
- 3" poly wheels for easy transport
- 12' attached pre-wired 115V cord with 3-prong plug and cord wrap
- 80° pivot range on oscillating models
- 30" fans have 1/2 HP high output performance motor
- Totally enclosed, maintenance free, direct drive high efficiency motors have completely sealed ball bearings, covered by a **Full Two Year Warranty**.
