LEADERS IN MOVING THE WORLD'S AIR

Heavy-duty Industrial Wall/Ceiling/Pole Mount Fan

High Output Performance High Efficiency Air Circulators

Our Heavy-duty Industrial Series is an industry leader in air performance. In today's market many retail fans look powerful, but move very little air. The opposite is true with our Heavy-duty Industrial Series which is designed for the industrial market where performance is mandatory for employee comfort and machine efficiency. It is available in black, white or safety yellow with a powerful two speed motor.

When it comes to transferring electrical energy efficiently into air energy for cooling, air recirculation or air movement, J&D Manufacturing is the world leader.

J&D Manufacturing's circulation fans when applied properly can be used in the following applications:

- Air de-stratification to help reduce heating and cooling bills
- Air exchange when placed in a wall opening or in open sidewall buildings
- Consistent air temperature throughout a room or building
- Heat stress relief indoors and outdoors for young and old
- Surface drying
- People cooling
- Machine/compressor cooling
- High velocity air cooling
- Insect control

VDF30HOB2 with optional
VRSBR901 Wall Mount Bracket

2 Speed

Features

- 30" fan with 1/2 HP high output performance motor
- Versatile mounting brackets allow for multiple placement and user options
- OSHA approved guard
- Corrosion resistant powder coated guards and brackets
- Fan and guards come completely assembled
- Available in high visibility safety yellow, black or white
- Oscillating and non-oscillating models
- Quiet operation
- Prewired with 115V attached 12' cord and 3-prong plug
- Totally enclosed, maintenance free, 2 speed direct drive high efficiency motors have completely sealed ball bearings, UL and ULC certification, built in automatic thermal overload protection, covered by a **Full Two Year Warranty**.
- Can be used with our misting/fogging product line.

**OSHA
Approved
Guard**
