LEADERS IN COW COMFORT

## Supreme 2000 Top Cover

By impregnating rubber into a layer of woven polyester, we have come up with a flexible, yet extremely durable top cover.

**Supreme 2000** is the strongest tensile strength top cover on the market today. This top cover has been tested and rated highest in puncture tests, abrasion resistance, and elongation tests.

### No Other Top Cover Compares to this Quality, Durability, and Performance.

The rubber has a non-slip surface and renders the top cover completely waterproof. A UV protector adds life to the product. This fabric can be used in either a tie stall or free stall operation. It is an exclusive product from J&D Manufacturing. **1 Year Warranty!** With good herd management and bedding, you can expect to greatly surpass the warranty period. Rubberized surface provides excellent traction yet is less abrasive to hocks when compared to competitor's cloth covers.

### Features

- Waterproof
- Provides excellent traction
- Standard 80" width
- Durable construction
- Low installation cost
- Proven cow acceptance
- Non-Absorbent
- Will NOT promote bacteria growth
- UV inhibitor to protect from sun exposure
- Use in either tie stall or freestall operation
- **1 year warranty**
