

Feeding Life Stages

TURKEY

STARTING FROM HATCHING

Feed to newly arrived turkey pullets up to 10 weeks of age or up to slaughter.

Nutrient	28% Turkey Starter
Protein (min) %	28
Lysine (min) %	1.60
Meth. (min)%	0.60
Fat (min) %	2.5
Fiber (max) %	5.5
Calcium %	1.0 to 1.4
Phosphorus %	0.95
Salt %	0.35 to 0.60
Se (ppm)	0.3

Provide free choice. Approximate need for 10 birds from Hatch to harvest is 500 pounds. (Assume 18 pound turkeys with even number of toms and hens) 28% Turkey Starter is available in a medicated form (Amprolium/Bacitracin) and a non-medicated from.

FINISHING

Feed as sole ration from 10 weeks of age until harvest.

Nutrient	18% Turkey Finisher
Protein (min) %	18
Lysine (min) %	1.0
Meth. (min)%	0.38
Fat (min) %	3.0
Fiber (max) %	5.5
Calcium %	0.9 to 1.2
Phosphorus %	0.8
Salt %	0.35 to 0.60
Se (ppm)	0.3

Provide free choice. Approximate need for 10 birds from 10 weeks to harvest is 350 pounds.
