

# Tips for Attracting Hummingbirds & Orioles

- Change nectar every 3 days, especially in warm weather. Clean your feeders with vinegar & water, and rinse well with each nectar change. Use brushes to clean hard to reach areas.
- Hang several feeders in your yard to prevent an aggressive bird from monopolizing a single feeder.
- Deter pesky ants with ant moats. Use a feeder with bee-resistant ports.
- Attract hummingbirds and orioles to your yard by planting nectar-producing flowering plants, shrubs and trees.
- Hang red or orange ribbons in your yard. Hummingbirds and orioles can see these colors and will find feeders more easily.
