Bacillus pumilus	15	33
Bacillus subtilis	15	33

The Rewards of Gardening

Dear Gardener:

One of man's strongest desires is to surround himself with beauty. The colors, shapes and scents of flowering shrubs lift the spirit. The wise person tries to create his own paradise, where he or she can retire for a time from the disordered world outside. The peace of recreational gardening among the green plants brings quietness to one's spirit.

Jonathan Green
Duxbury Farm
He dreamed of a green new world.

DIRECTIONS FOR USE

HOLLY CARE stimulates excellent growth for all of your shrubs and acid-loving plants with a rich combination of natural ingredients and 2.8% Organic Nitrogen. HOLLY CARE is specially formulated for all acid-loving plants, including:

Amaryllis	Dogwood	Holly	Magnolia	Pine
Andromeda	Evergreens	Huckleberry	Marigold	Raspberry
Arborvitae	Ferns	Hydrangea	Mountain Ash	Rhododendron
Aster	Fir	Inkberry	Mountain Laurel	Spruce
Azalea	Gardenia	Juniper	Oak	Strawberries
Bayberry	Heath	Leucothoe	Pachysandra	White Pine
Bleeding Heart	Heather	Lily-of-the-Valley	Phlox	White Cedar
Blueberry	Hemlock	Lupine	Pieris	Woodsorrel
Camelia				

FEEDING ESTABLISHED PLANTS

1. For established plants, one to two feet in diameter, spread 1-1/2 cups evenly on the surface of the ground under the plant in the Spring. For larger plants (two to four feet in diameter), spread three cups evenly under plant. Azaleas, Rhododendrons, and other evergreen plants have fine feeder roots close to the soil surface, so there is no need to rake HOLLY CARE in. Raking may damage these roots.
2. When feeding, spread HOLLY CARE on the ground or the mulch around plant base covering an area slightly larger than the spread of the branches. Cover with mulch if needed and never cultivate. You may risk damaging the fine feeder roots.
3. A repeat feeding, after the blooming period in the Spring, can be beneficial. A final feeding, in the late Fall, at 1/2 the Spring rates is also very desirable.

NEW PLANTINGS

1. Dig the planting hole at least twice the diameter and twice the depth of the root ball. For small plants, (under two feet in diameter), add two cups of HOLLY CARE to loose soil to be back-filled in the bottom of the planting hole and mix thoroughly with 1/3 peat moss into the soil. The peat moss will aid in moisture retention. Increase the amount of HOLLY CARE to three cups for larger plants (two to four feet in diameter).
2. Once the new plant is in place, back-fill the planting hole with a mixture of 1/3rd peat moss and 2/3rds soil.
3. Water new plants twice weekly, (more often during periods of extreme heat or drought), during the first growing season until the plants become established. Deep, infrequent watering will help encourage a deep, healthy root system. Frequent, shallow "sprinklings" will force the roots to stay near the surface, making them less drought tolerent.

TIPS: To conserve moisture and protect the shallow-rooted shrubs, an organic mulch (pine bark or shredded cedar bark) should be placed under your plants. You may want to use your own compost as a mulch, which would be excellent. In any case, mulch should be spread flat or saucer shaped, (not mounded), to prevent run-off of water and nutrients from the root zone. A two inch space should be left between the trunk and the mulch when applying this product. After each feeding, water the plants to release the nutrients in the fertilizer.

UNITS OF MEASURE

Normally, a one pound coffee can holds about 2-1/2 lbs. of fertilizer.
One level cup of fertilizer equals approximately 1/2 pound.

My Pledge Of Satisfaction

We have made every effort in the formulation of this product to insure that you will be satisfied with the results. If, for any reason, you are not satisfied, please write and describe the problem. Our garden specialists will make every effort to assure your success.

Jonathan Green

CAUTION: Keep out of reach of children. DO NOT apply to sidewalks, driveways, patios, or other concrete surfaces as staining may occur. After application sweep fertilizer off concrete surfaces to avoid staining.

NOTICE: Seller makes no warranty, expressed or implied, concerning the use of this product other than as indicated on the label. Buyer assumes all risk of use and/or handling if such use is contrary to label instructions.
