

# DID WINTER LEAVE YOUR LAWN SALTY?

## WINTER'S DEICERS CAN HURT THIS SPRING'S LAWNS!

Many deicers leave sodium behind long after the ice and snow is gone. Sodium contaminates soil, which is toxic to plants and changes the soil structure to be tight and impenetrable for water. If the salt concentration in the soil is too high, it can even draw water out of plant roots.

### COMBAT SODIUM IN YOUR LAWN WITH THESE JONATHAN GREEN PRODUCTS:

#### NUTRASOFT Pelletized Gypsum

- Helps neutralize salts, provides calcium and sulfur
- Improves water infiltration of the soil
- Loosens clay packed soil

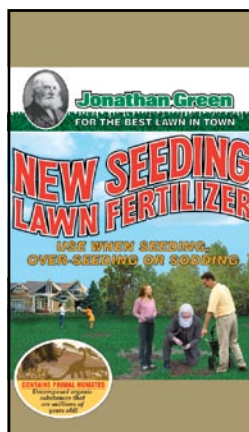

#### MAG-I-CAL Calcium Fertilizer

- Rapidly raises soil pH
- Improves soil structure
- Contains humates to restore soil life

#### LAWN REPAIR MADE EASY Seed, Fertilizer & Mulch Combination

- Quick and easy repair of lawn bare spots
- Contains fast germinating seed with reduced watering needs

#### NEW SEEDING Lawn Fertilizer

- Use when seeding, over-seeding or sodding
- Formula helps build a vigorous root system
