"We milk 365 cows and have a RHA of 31,000. If I would have known the benefits of the pasteurizer, we would have put one in 20 years ago. The difference is like night and day, we have healthier calves, no death loss since we put the new pasteurizer in and no scours or sick calves. We recommend the CMP 2000 from Darlington Dairy Supply because of ease of use, self cleaning, milk strainer, cooling option, pasteurize complete warming and the 30 day free trial. We are very happy with the purchase of our pasteurizer and the results we are receiving."

"We are a 2,300 milking cow dairy and have had a CMP 2000 pasteurizer for the past 4 years. This is a very dependable and user friendly piece of equipment. We have also appreciated the great service we received from Darlington Dairy Supply. We highly recommend both the use of this pasteurizer for your calf milk pasteurization needs and the patronage to Darlington Dairy Supply."
