

HOW TO USE THE **ENHANCED** CURT APPLICATION GUIDE

A New Way to Order Class 1 & 2 Hitches

Historically, CURT class 1 & 2 hitches have shipped with the appropriate ball mount, pin and clip. This helped ensure that the end user received the ball mount appropriately sized for that hitch. However, it also limited your options. In 2010 CURT will offer every class 1 & 2 hitch in any of the package options listed below.

Option 1

Hitch with Standard Ball Mount, pin & clip
Order 5-digit hitch number (12093)

Option 2

Hitch only
Order 5-digit hitch number with "0" at end (120930)

Option 3

Hitch with 1 7/8" Euro Mount, pin & clip
Order 5-digit hitch number with "1" at end (120931)

Option 4

Hitch with 2" Euro Mount, pin & clip
Order 5-digit hitch number with "2" at end (120932)

Xtra and Industrial Duty Hitches

We have expanded our Heavy Duty hitch options to include the Xtra Duty Series (XDC), a higher capacity 2" receiver, and the Industrial Duty Series (IDC), a high capacity 2 1/2" receiver. XDC hitches are listed in **Bold** and IDC hitches in **Blue** in the application guide.

Electrical Section Updates

Updates to the T-connector section include the addition of a notes column and a column identifying if the T-connector is battery powered. The new Splice-in Converter listing identifies either a circuit protected or non circuit protected converter for each vehicle application. The converter listed is our minimum suggested converter. If a non-powered converter is listed and you would like to upgrade to a powered converter, those upgrade options are listed in the header of this section.

ELECTRICAL	
<p>NO SPLICING REQUIRED T-CONNECTORS SEE PAGE 204 FOR PHOTOS</p>	<p>SPLICE-IN CONVERTERS UPGRADE TO POWERED FROM → TO 56130 = 56187 56175 = 56146</p>

Footnotes and Shading

The footnotes section is used to identify installation notes and discontinued product. We also shade certain hitch numbers in blue if they only ship from our Wisconsin and Massachusetts locations. See the bottom of any application guide page for detailed footnote and shading information.

The Quickest Way to the Newest Applications

Scan this with your web-enabled camera phone. Your phone's browser opens a webpage where you can view the most up-to-date CURT Hitch Application Guides.

- To download the ScanLife reader - Text 'scan' to 43588.
- Launch ScanLife and scan the code. Standard data rates may apply.
